Research Overview

My research is driven by the goal of developing AI agents that interact in the physical world, focusing on generative AI as a toolbox for solving such problems. A unique challenge in applying generative AI in this setting is the lack of available decision-making data and the necessity to generalize well to previously unseen situations. My work addresses this by proposing compositional generative modeling, where simple generative models are learned and composed together to construct complex generative models that generalize beyond the narrow amount of available data. My work has illustrated how such compositionality solves various problems in constructing AI agents ranging from complex scene understanding, trajectory planning, multimodal perception, and hierarchical planning. My work has further shown how such developed techniques can be broadly applied to settings in sciences and engineering.

Research Areas: Generative AI, Machine Learning, Computer Vision, Robotics, AI for Science.

Education

Ph.D. EECS 2020-2024	Massachusetts Institute of Technology (MIT) Advisors: Leslie Kaelbling, Tomás Lozano-Pérez, and Joshua B. Tenenbaum Thesis: <i>Learning to Generate Compositionally</i>
M.S. EECS 2019-2020	Massachusetts Institute of Technology (MIT) Advisors: Leslie Kaelbling, Tomás Lozano-Pérez, and Joshua B. Tenenbaum Thesis: <i>Implicit Learning with Energy-Based Models</i>
B.S. 2015-2019	Massachusetts Institute of Technology (MIT) EECS, GPA: 5.0 / 5.0

Employment

Graduate Researcher 2019-Now	Computer Science and Artificial Intelligence Lab, MIT LIS Group (PIs: Tomás Lozano-Pérez and Leslie Pack Kaelbling)
Graduate Researcher 2019-Now	Brain and Cognitive Science Department, MIT Computational Cognitive Science Lab (PI: Joshua Tenenbaum)
Researcher 2023-Now	Pika Labs Text-to-Video Synthesis / Running Research Intern Program
Research Intern Summer 2023	Google Robotics Research Intern Working on Video Models for Robotics
Student Researcher 2022-2023	Google Brain Student Researcher Working on Video Models for Decision Making
Research Intern Summer 2022	Deepmind Research Intern Working on Compositional Generative Modeling

Visiting Researcher 2020-2022	Facebook AI Research Visiting Researcher on the FAIR Proteins (Generative Biology) Team
Research Intern Summer 2019	Facebook AI Research Research Intern on the FAIR Proteins (Generative Biology) Team
Research Fellow Summer/Fall 2018	OpenAI Research Fellow Working on Generative Models

Awards and Honors

Best Paper Award at NeurIPS Instruction Following Workshop	2023
Outstanding Paper Award at ICRA RAP4Robots Workshop	2023
Qualcomm Fellowship Finalist	2022
Outstanding Paper Award at NeurIPS Workshop on Controllable Generative Modeling	2021
National Science Foundation (NSF) Graduate Research Fellowship	2020-2024
Open Philanthropy Fellowship Finalist	2020
International Biology Olympiad Gold Medal	2014,2015
